Board of Trustees.

Rev. W. C. Condit, D. D.,	Ashland, Ky.
Rev. John Barbour, D. D.,	Maysville, Ky.
John A. Simpson, Esq.,	Covington, Ky.
Mr. W. H. Averill,	Frankfort, Ky.
James A. Curry, Esq.,	Lexington, Ky.
W. O. B. Ratliff, Esq.,	Pikeville, Ky.
Mr. James Hatcher,	Pikeville, Ky.

Officers of the Board of Trustees.

Rev. John Barbour, D. D.,	President.
Rev. W. C. Condit, D. D.,	Secretary and Treasurer.

FACULTY.

REV. JAMES F. RECORD, PRINCIPAL,
Bible and Civics.

MISS IDA M. TAYLOR,
Supervisor of Training School and Teacher of English and History.

REV. W. B. AUGER,
Latin, Greek, Mathematics, Science.

Fifth, Sixth and Seventh Grades.

MISS ROBERTA A. SANDUSKY,
Assistant in Training School.

Music and Librarian.

Course of Study.

COLLEGIATE DEPARTMENT.

This embraces two courses, the Classical and the Scientific. There are two years given to this department and students completing either of the courses are prepared for entrance to the Freshman class in the best Colleges, to the course which he has pursued. The Classical course includes the studies usually required in American colleges for entrance to Freshman class. The scientific course is especially designed for those who for any reason cannot complete a full college course, or who are studying for the degree of B. Sc., and fits for entrance to the Freshman class leading to that degree. Electives are allowed in the second year of this course to students who do not expect to complete a full college course.

PREPARATORY DEPARTMENT.

This embraces three years work. The first two years includes the work usually required in 7th and 8th grade, including also easy Latin and Elementary Algebra, which is begun at the beginning of the winter term of the second year. The third year the class completes Elementary Algebra, English Grammar, United States History, Elements of Civics, and has Latin four hours a week.

TEACHER'S COURSE.

For the accommodation of those who teach in the free schools during the Summer and Autumn, a Teachers' course will be maintained during the third and fourth terms—five months in the two terms. This course will embrace a thorough study of the branches required by the School Law of Kentucky for teachers' certificate, including the subjects required for a State certificate. The thoroughness with which this course is pursued is evident from the results of the teachers' examination. All of the students who were applicants for certificates this Spring were licensed. No one receiving lower than second class. We have had only three failures in three years.

MUSIC DEPARTMENT.

We would especially call the attention of parents, who wish to give their daughters a musical education, to this department.

Because of the connection of this department with the Academic department of the school, students can pursue a course of music here the equivalent of which in a special college of music would cost more than three times as much. Besides music students can pursue Academic studies in connection with the music.

INTERMEDIATE AND PRIMARY.

At the urgent request of many of the parents of Pikeville, we will continue the Intermediate and Primary departments. So long as the school continues these departments no pains will be spared to make them the very best possible. Expert teachers will be secured and the latest methods in child-training will be used. This work will be done in the training school under the supervision of Miss Ida M. Taylor, of whom Prof. George, head of the training school of the Ypsilanti State Normal, Michigan, says: "She is the best training teacher I ever saw at work." Miss Taylor will be ably assisted by Miss Roberta Sandusky.

BUSINESS COURSE.

This course embraces book-keeping, penmanship, commercial arithmetic, business forms, stenography, (short hand) and typewriting.

ADMISSION.

For entrance to the preparatory department a student must pass a satisfactory examination in English Grammar to Syntax, including analysis of the simple sentences. Arithmetic to percentage, elementary United States History, elementary physiology, political geography, reading and spelling.

For entrance to the collegiate department, classical course, he must pass a satisfactory examination in Elementary Algebra (Ray,) Arithmetic, English Grammar, including composition, Latin Lessons

and Grammar, Physical Geography, United States History, Elements of Civics, and first steps in English and American Literature.

Students who are classified as "special" are permitted to enter any class by satisfying the faculty of their preparation for entrance to the subject to be pursued.

COURSES OF STUDY.

Preparatory Department.

FIRST YEAR.

	Number of periods each week.
Mathematics.....	Third part Arithmetic 5.

Psychology.....	McLellan	3.
Civics.....2	Spelling.....2	Bible.....1.

AIM OF INSTRUCTION.

The instruction given in the Pikeville Collegiate Institute covers all the branches usually required for entrance to the Freshman Class of our best colleges. We realize the advantage to the student pursuing the college curriculum of a thorough preparatory training. Thoroughness is aimed at in all our teaching. We do not seek merely for the pupil to cover a given number of subjects and cram a given number of facts, but he is urged to do his own thinking and so far as he is able to find the reason for the things he is learning. All students are urged to complete a full college course, but if for any reason any of them are hindered from this, our school is designed to lay such a foundation for an education and to create such a desire for knowledge that no student will cease to be a student after he leaves here although he may not be able to complete his college course as a resident student.

More time is given to reading, writing, spelling, arithmetic, English grammar and composition, United States History and Political geography than is usually given to those subjects in the best preparatory schools. We also cover more mathematics than is usually required for entrance to Freshman year.

BIBLE INSTRUCTION

The Bible forms a regular part of the curriculum and the course is so arranged that the greater part of it is gone over in the five years of the Preparatory and Collegiate course. While all students receive instruction in the Bible there is nothing sectarian or denominational taught. The aim in all Bible instruction is to lead the pupil to the Lord Jesus Christ.

MATHEMATICS.

Arithmetic.—The first year of the Preparatory is given to a thorough study of Common and Decimal Fractions, Denominate numbers and Proportion. The second year to a thorough study of Per-

Any damage done to property of the Institution by the students must be paid for.

All students will be expected to be prompt in attendance on all the exercises of the school and to observe cheerfully all rules.

No student will be permitted to continue in the Institution who in the judgment of the faculty exerts a bad influence among his associates.

Expenses.

TUITION.

Collegiate course, per term	\$6.00
Preparatory course, per term.....	5.00
Primary and Intermediate, first two terms, per term.....	4.00
Tuition in Primary and Intermediate for the last two terms will be announced at the beginning of the year.	
Music alone, per term,	7.50
Academic students studying music.....	6.00

BOARDING.

Boarding in Hendrick's Hall, per week.....	2.50
Boarding in private families may be had at from \$2 to \$3 per week.	

Tuition and boarding in the Hall are invariably payable in advance.

LENGTH OF TERM.

The first two quarters are eight weeks each and the second two on ten weeks each. The school year is thirty-six weeks.

Competitive Examinations.

Two scholarships were offered on competitive examination. One to the person in the Teachers class who passed the best examination at the beginning of the year and the other to the student who made the best average in the May County Teachers' Examination. Mr. Virgil Gray was awarded the first and Mr. N. T. Johnson the second. Mr. Johnson's certificate averaged nearly 92 per cent.

Hendrick's Hall.

This building was erected for a Teacher's Home and Ladies' Dormitory. Girls from out of town are boarded at the Hall and are under the care of the lady teachers and the principal's wife. Students boarding in the Hall have the advantage of a Christian home of culture and refinement, advantages which parents ought to consider in selecting a school for their daughters. Especial care is given to the girls who are placed in the home, and the highest words of commendation have been received from parents of the girls who have been with us.

Girls in the dormitory will be required to furnish their own napkins and towels. Each one should be provided with at least a half dozen napkins and that many towels and have each piece plainly marked.

No girl will be taken into the dormitory who is under thirteen years of age.

Examinations.

Written examinations will be held at the close of each term and the result of the examination will be reported to the parents or guardian of the student. The class standing will be reported at the close of each month.

No student will be continued in a class for the work of which his class standing, examination, or deportment show him to be unfit.

Government.

The Institute has but few rules and the government will be mild, giving to the students all privileges and enjoyment consistent with his own welfare and the best interests of the school.

are required to attend one preaching service on Sunday and one of the Sunday-schools.

There are also a Westminster League, and also Junior League for the Primary and Intermediate pupils on Sunday p. m., and Senior League in the evening. Prayer meeting on Wednesday evening, which all the older students are urged to attend.

Library.

We have this year received several hundred volumes from the Rev. Geo. A. Joplin which is the beginning of a Library to be known as the Hitchcock Memorial Library. Miss Ida M. Taylor has given forty volumes among which are Fiske's American Revolution, Critical Period, New England and Her Colonies, and the Dutch and Quaker Colonies in America.

One room in the new part of our building will be used as a library and reading room. With a good room for our books and facilities for the students to use the reference books, we ought to be supplied with them. We need a good Encyclopedia, one more Unabridged Dictionary, a complete set of the Cambridge Bible for schools and colleges, a complete work on United States History, such as Fiske or Bancroft, and books on biography and travel.

Improvements to Campus and Buildings.

The Board of Trustees last year calcemined the walls of the school building and painted the wood work. They also built ninety feet of brick pavement in front of the Campus. An addition to our present school building will be completed this summer, giving us an auditorium, two additional recitation rooms and a library and reading room.

Scholarships.

Scholarships were provided for this year by Mr. W. H. Averill, R. B. Ivory, Esq., Judge A. J. Auxier, Miss Bessie Darby, The Woman's Missionary Society of the Central Presbyterian Church, Meadville, Pa., The Junior Society of the Presbyterian Church, Frankfort Ky., Primary Sunday School Class of the same church and a "Friend" from Ashland, Ky. Twenty dollars pays the tuition of a student in the school for one year.

HISTORY.

Pikeville Collegiate Institute was founded by Ebenezer Presbytery, Synod of Kentucky, at Pikeville, Kentucky, in 1888. The school was opened in the autumn of the following year. It has been most loyally supported by the churches of Ebenezer Presbytery and particularly by the Woman's Missionary Societies of the Presbytery, working through the Woman's Home Missionary Board of the Presbyterian Church.

The present school building is the one first erected, but is inadequate to meet the present demands of the school. Hendrick's Hall for the teachers and lady boarders has been erected, which will accommodate the teachers and twenty boarders. Through the generosity of the ladies of some of the churches a number of the student's rooms have been very comfortably furnished and Mr. John A. Simpson, of Covington, Kentucky, has papered them. The Young Ladies' Missionary Society of the Ashland church has furnished a student's reading room in the dormitory.

Location.

Pikeville is the county seat of Pike County, Kentucky, situated at the head of navigation on the Big Sandy River. It is the best town in the Sandy Valley and one of the best in Eastern Kentucky, besides having the most picturesque scenery. Surrounded as it is by vast mineral resources, it only awaits the development of this region to become a large and important city. There are no saloons in the town, or nearer than twenty-five miles.

It is easy of access by river in season, and by daily hack from Williamson, W. Va., on N. & W. and with the C. & O., at Whitehouse, Ky. We have daily mail from each of these places.

Religious.

The school opens with chapel exercises at 8 a. m., at which all students are required to be present. As outlined in the course of study the Bible is regularly and systematically taught to all students.

seven grades. Each week's work of the entire school year will be outlined and placed in the hands of the assistant and student teachers. Each day each student teacher will either teach one class in the presence of the supervisor of the department or one of her assistants, or will be present while one of the training teachers is teaching a class. The student teachers will also meet with the training teachers once each week when they will be instructed in the latest methods of teaching. Miss Ida Taylor, who was for four years training teacher in the Ypsilanti State Normal School, Michigan, will be supervisor of this department, assisted by Miss Roberta Sandusky.

Our model school will serve two purposes: First, it will offer to the patrons of our school who have children in the first seven grades instructions by and under the direction of skilled training teachers. Only the latest and best methods of teaching will be used. That boy who has come under the tuition of a skillful teacher the first eight years of his school life has a fairly good knowledge of the common branches. But what is better he has learned how to study and to desire knowledge for knowledge's sake and although circumstances should prevent his being in school longer he will not cease to be a student. That child who hates school will almost invariably be found to have acquired his hatred for school and school work because of an incompetent, lifeless teacher. Second, it will offer to the teachers and those preparing to teach superior opportunities of professional training. Young men and women graduating from our school and who have had practice in the model school for two sessions will be assisted in securing positions in graded schools.

PHYSICAL CULTURE.

Physical culture will be a regular feature of our work. The Swedish system will be used. The purpose of this will be to correct improper positions of sitting, standing, and walking; to develop the chest and lung expansion; to develop a systemetrical figure and give graceful carriage.

So important does the State of Pennsylvania regard physical training in the education of her youth, that the legislature of that State has made the teaching of it compulsory in all public schools and requires all public school teachers to pass an examination in it.

VOCAL MUSIC.

Singing will be taught in all grades. Instruction will be given in the rudiments of vocal music, the pupil being taught to sing by note.

to student's knowledge of the Greek Grammar.

Text Books: Harper and Water's Inductive Greek Method; Goodevin's Greek Grammar; Harper and Wallace's Anabasis.

TEACHER'S COURSE.

SUBJECTS PURSUED IN THE TEACHERS' COURSE—Ray's Higher Arithmetic is taught beginning with Percentage and completed with a review of Common and Decimal Fractions, Longitude and Time and Proportion. Should any of the teachers not be prepared for the Higher Arithmetic another class in this subject will be formed. Five periods each week of forty-five minutes each are given to this subject.

Reed and Kellogg's Grammar is used as a text in English grammar and Swinton's English Composition. Five periods each week are given to this subject. Special attention is given to analysis, diagrams and parsing in grammar, definitions, construction of sentences, letter writing, etc., in composition.

United States History, Civics, Geography, and Physiology are thoroughly and systematically reviewed. Three periods a week are given to United States History, two to Geography, three to Civics, two to Physiology. Spelling is regularly taught.

Two periods each week are given to Methods of Teaching with Page's Theory and Practice of Teaching as a text and three periods to Psychology as applied to teaching, with McLellan as a text.

Written reviews are given at the end of each month and the papers read and mistakes noted by the instructor. The papers are then returned to the student who is expected to make corrections.

INTERMEDIATE AND PRIMARY.

The work done in these two courses is equivalent to that done in the first grades of our best city schools. The text books are those used in the public schools of Pike county with few exceptions.

MANAGEMENT.

The Institute is under the management of a Board of Trustees the members of which are appointed by Ebenezer Presbytery. The Principal of the school is appointed by this Board and Commissioned by the Woman's Board at New York City.

MODEL SCHOOL.

A training school will be organized in which student teachers will have actual experience in teaching under the supervision of a skilled training teacher. Work will be done in this department in the first

HISTORY.

Three years are devoted to the study of United States History as given in the ordinary text books on that subject. Barn's and Montgomery's histories will be used as text books and during the last half of the third year a more exhaustive treatise will be read in connection with class room work.

CIVICS.

This subject will be studied both years of the Collegiate course. The first year will be given to the study of Fisk's Civil Government and the second year to Andrew's Manual. Students will be required to read the first volume of Bryce's American Commonwealth during the last term of Senior year.

GEOGRAPHY.

The first two years and half of the third, are given to the study of Political Geography, and last half of the third to Physical Geography. Text books; Eclectic Kentucky Edition and Houston's Physical Geography.

LATIN.

The study of this language will begin with the winter term of the second year preparatory course and continue through the Collegiate course. From the beginning accuracy in pronunciation, and in knowledge of inflectional forms is required. The work of the first year consists in acquiring the elementary principles of the language and reading easy selections in preparation for the more difficult reading of Cæsar. Particular attention is given to the study of the Grammar through the entire course.

Text Books: Collar and Danilell; Cæsar, Cicero, and Virgil, Allen and Greenough; Latin Grammar, Allen and Greenough.

centage and its application, Square and Cube Root and its applications. Third year to Raub's Complete Arithmetic.

Algebra.—Two full years are given to the study of Algebra, completing Ray's Elementary Algebra and Wentworth's School Algebra.

Geometry.—Geometry is completed and one term given to Plane and Spherical Trigonometry.

ENGLISH.

The first two years are given to Orthography and Etymology with the analysis of simple sentences. Special attention is devoted to letter writing and memorizing short selections. The third year is given to analysis, False Syntax, and Composition. Paragraph writing is begun. Narratives and descriptions are distinguished, and models for both are carefully studied. The aim here is for clearness of thought, so that conciseness and accuracy of expression will follow. A certain amount of outside reading from English and American authors is required. This is discussed in class and used as a basis for the work in composition. During the first and second terms essays are written once a month, corrected and re-written. During the third and fourth terms essays are written weekly. Exercises in dictation are given throughout the year. Emphasis is placed upon sentence structure and the correct use of words.

First year of Collegiate work.—For careful study, in class: Shakespeare's Merchant of Venice, Irving's Sketch Book, Hawthorne's Short Stories, Scott's Lady of the Lake, and paragraph work from Scott and Denny's Composition-Rhetoric.

Second year.—For careful study: De Quincey's Flight of a Tartar Tribe, (or Burke's Conciliation with America), Shakespeare's Macbeth, Woddy's Rhetoric and a brief outline of English Literature. In both years Collegiate work, compositions based upon **reading** and text-book, and description and narratives taken as far **as possible** from the pupil's daily life and experience, are required **once a week**. **Emphasis** is placed upon paragraph structure, vocabulary, and **ease, force** and elegance of expression. Some attention is **given to the planning** of long themes. At least three are required.

During the last year of the **Preparatory work** and the two Collegiate years, at least fifteen books **out of a carefully selected** list of thirty must be read outside.
